Department of Natural Resources

Division of Oil, Gas & Mining

ROBERT L. MORGAN Executive Director

LOWELL P. BRAXTON Division Director

# OLENE S. WALKER Governor

GAYLE F. McKEACHNIE

Lieutenant Governor

Representatives Present During the Inspection:			
Company	Gary E. Gray Resident Agent		
OGM	Karl Houskeeper Environmental Scientist III		

# **Inspection Report**

Permit Number:	C0150032		
Inspection Type:	PARTIAL		
Inspection Date:	Tuesday, April 12, 2005		
Start Date/Time:	4/12/2005 1:00:00 PM		
End Date/Time:	4/12/2005 3:00:00 PM		
Last Inspection:	Wednesday, March 09, 2005		

Inspector: Karl Houskeeper, Environmental Scientist III

Weather: Clear, Temp 62 Deg F
InspectionID Report Number: 580

Accepted by: pgrubaug 4/15/2005

Permitee: GENWAL RESOURCES INC
Operator: GENWAL RESOURCES INC
Site: CRANDALL CANYON MINE

Address: PO BOX 1077, PRICE UT 84501

County: **EMERY** 

Permit Type: PERMANENT COAL PROGRAM

Permit Status: ACTIVE

**Current Acreages**

#### REVIEW OF PERMIT, PERFORMANCE STANDARDS PERMIT CONDITION REQUIREMENTS

- 1. Substantiate the elements on this inspection by checking the appropriate performance standard.
  a. For COMPLETE inspections provide narrative justification for any elements not fully inspected unless element is not appropriate to the site, in which case check Not Applicable. b. For PARTIAL inspections check only the elements evaluated.
- 2. Document any noncompliance situation by reference the NOV issued at the appropriate performance standard listed below.
- Reference any narratives written in conjunction with this inspection at the appropriate performace standard listed below.
   Provide a brief status report for all pending enforcement actions, permit conditions, Divison Orders, and amendments.

### 1. Permits, Change, Transfer, Renewal, Sale

Pending Amendments: South Crandall Lease Revision was approved by the state on April 1, 2005, pending approval of the Mining Plan by the Secretary. Modification to Lease U-68082 Task #2132 was approved on 2/28/2005.

#### 2. Signs and Markers

The Mine ID sign is posted at the entrance to the permit area from the forest service road. The sign contains the name, permit ID #, address, and phone number of the operator. All other signs and markers observed during the inspection met the coal rules.

#### 3. Topsoil

The snow has melted off the top of the lower topsoil pile. The silt fence around the topsoil pile is intact.

# 4.a Hydrologic Balance: Diversions

The diversion behind the crusher building still has snow within it reaches. Coal has been spilled in the diversion on top of the snow. Efforts have been made to remove the coal from the diversion, but additional maintenance and clean-up is still required. In addition to the coal in the diversion there are several lengths of pvc pipe adjacent to the diversion and in the diversion that need to be removed. The diversion is still open and runoff was flowing through the diversion and culvert inlet.

There are metal bands, wood, and a large piece of metal in the inlet to the culvert by the south fan. The inlet and culvert are still functional, but the trash needs to be removed.

#### 4.b Hydrologic Balance: Sediment Ponds and Impoundments

The sediment pond has received runoff from the snow melt and the elevation of the pond has risen within 3-4' before reaching the discharge structure. A sheen is present on top of the pond, which could be from coal fines and/or oil and grease. A map reflecting the sediment pond configuration after the last pond cleaning still needs to be edited and sent to the Division to be approved and placed in the approved MRP.

#### 4.d Hydrologic Balance: Water Monitoring

Fourth quarter 2004 water quality information is in the EDI website and uploaded. Water monitoring is current. Baseline parameters need to be utilized in 2005.

## 8. Noncoal Waste

The yard, pad areas, and diversions are in need of a general spring clean-up. There are several noncoal waste items throughout the mine site that need to be picked up and placed in the appropriate storage facility.
